

Renewable Energy: Sustainable Energy Concepts for the Energy Change (2nd Revised edition)

By Roland Wengenmayr, Thomas Buhrke, William D. Brewer

Wiley-VCH Verlag GmbH. Hardback. Book Condition: new. BRAND NEW, Renewable Energy: Sustainable Energy Concepts for the Energy Change (2nd Revised edition), Roland Wengenmayr, Thomas Buhrke, William D. Brewer, In the years since the publication of the first edition of this book, the world has undergone drastic changes in terms of energy sources. This is reflected in the expansion of this second edition from 20 to 26 chapters. The most dramatic occurrence was the Tsunami which struck Japan in March of 2011 and set off a reactor catastrophe at the nuclear power plants in Fukushima. On the other hand fossil fuel technology drives the climate change to a threatening level. So, renewable energy sources are essential for the 21st century. The increasing number of wind power plants, solar collectors and photovoltaic installations demonstrates perceptibly that many innovations for tapping renewable energy sources have matured: very few other technologies have developed so dynamically in the past years. Nearly all the chapters were written by professionals in the respective fields. That makes this book an especially valuable and reliable source of information. The second edition is extended by several new chapters such as tidal power stations, the Desertec project, thermography of buildings and...
