Kansas University Quarterly Volume 8 (Paperback)

By University Of Kansas

Not Avail, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1899 Excerpt: . mine was opened. In the same wall were found sphalerite and chalcopryite, by the oxidation of which the mineral was no doubt produced. As these minerals occur throughout the district, the substance here described may be found in any of the mines of the region. The properties of Cupro-Goslarite are as follows: Translucent; light greenish-blue in color; hardness, 2; luster, vitreous; brittle. It is almost completely soluble in cold water. On exposure to the air loses a part of its water and becomes white. Before the blowpipe fuses readily to a black non-magnetic mass, the flame being colored green. As a comparatively large amount of copper was indicated by a qualitative chemical examination, it was thought desirable to make a complete quantitative analysis of it. Zinc sulphate, $\text{SnSO}_4 \cdot 7\text{H}_2\text{O}$, loses six molecules of water at 100 C and the seventh at 260 C. As it...
